Turn-key Systems

- From concept to completion

Turn-key particle accelerator systems

RI Research Instruments GmbH designs and delivers turn-key particle accelerator systems for research, industry, and medical applications.

Our team of engineers and physicists has a proven track record in developing customized solutions for demanding customers worldwide.

Production / operation ready systems

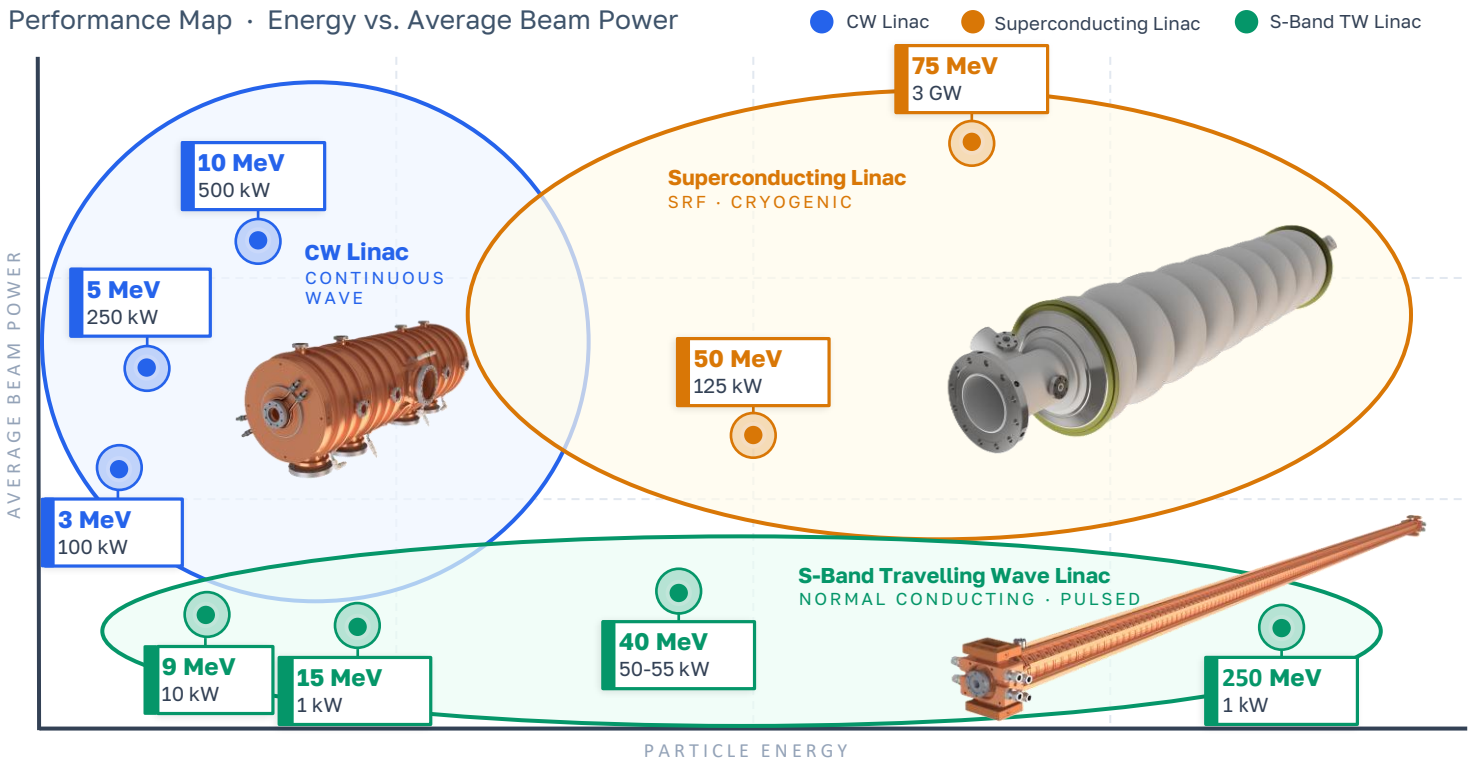

Each of our systems is specifically developed and manufactured to our customer's individual needs and ready for immediate use. Our turn-key systems are environmentally friendly, as we design and build each one tailored to our customers' needs, allowing us to optimize the energy efficiency and reduce waste.

Portfolio in electron acceleration

We offer a wide range of ready-to-use and concept turnkey particle accelerator systems tailored for various applications. Below is a diagram showcasing the different types of electron accelerators available to suit your specific needs.

Accelerator Technology - Electrons

Performance Map · Energy vs. Average Beam Power

Applications

From scientific research and Big Science to sterilization, isotope production, medical treatments, polymerization, and NDT our particle accelerators drive innovation across industries.

Other Particle types

We offer also turn-key systems for a wide range of other particles including protons, ions and neutrons for diverse industrial, medical and scientific applications.

- We are happy to help!

If you can think it, we can build it.

Let's team up and see how our experts can support your cause.
